WAICENT encompasses information systems such as:
FAOSTAT - the FAO statistical database which contains a complete dataset on all relevant agricultural domains from around the world. The database, which can be queried free on the Internet, provides statistics for more than 210 countries and territories and 3 000 items in the areas of agriculture, fisheries, forestry and nutrition.
The FAO Documentation Catalogue - a complete listing of FAO documentation which can be searched on the Internet. It links directly to the full document when available.

WAICENT also provides the information systems platform for FAO's specialised information systems such as:
The Information Network on Post-Harvest Operations supports a global network of organizations participating in this programme. Relevant information in a variety of formats is readily accessible and interactive features such as a Question and Answer Service are at the disposal of those who wish to consult and contribute to the programme. This information system is also available on CD-ROM.
The Gender and Food Security website which serves as a single entry point for a wealth of information on this topic. The site integrates statistical data, documents, maps, photographs and videos.
